

Lesson 14

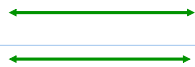

Lines and angles

• Point — Names a location in space

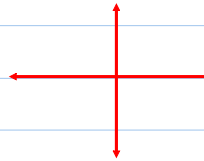

—• Line Segment
Part of a line with 2 endpoints

↔ Line
continues in both directions
FOREVER

↔ Ray
start point and goes in one direction
FOREVER

Parallel
(NEVER CROSS)

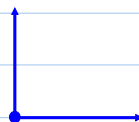

PERPENDICULAR
(forms right angles)

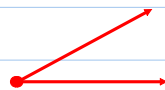

ANGLE-

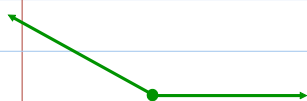

2 Rays that share an endpoint

Right Angle = 90°

Acute Angle = $< 90^\circ$

Obtuse Angle = $> 90^\circ$
